#A denotes the number of vulnerability alerts. FreeRTOS (indices 1–71), TizenRT (72–122), RT-Thread (123–154), and ThreadX (155–210). The FreeRTOS prefix `MPU_` is omitted for brevity. FreeRTOS: CVE-2024-28115 (indices 1–71, following the paper's association). RT-Thread: CVE-2025-1115 covers 26 calls, excluding indices 123, 124, 126, 133, 134, and 142. The individual mappings are CVE-2025-5865 (134), CVE-2025-5866 (123), CVE-2025-5867 (133), CVE-2025-5868 (126), CVE-2025-5869 (142), and CVE-2026-14607 (124). CVE-2025-6693 additionally covers the six device calls at indices 131, 139, 140, 144, 145, and 148. ThreadX: CVE-2025-55078 and CVE-2025-55080 jointly cover indices 155–210. Public advisory scope and the detailed index mappings are documented in the accompanying Markdown and JSON files. Index associations are not separate CVE assignments.
